

Successfully Implementing AI in Software Development

From Experimentation to Transformation

Pascal Euhus - IPC 2026

Hi, I'm Pascal

- Lead Architect@ Reservix
- Using AI and LLMs extensively
- Curious and Hands-On on tech

”*Everything is self-reported...*

Participants that made use of AI
Believe to be ~20-30% faster

Observed:

-19%

*”Everything is self-reported...
How can we enrich this with insights?*

Why do we even want to track AI impact?

Why do we even want to track AI impact?

IS AI MAKING US BETTER

OR JUST BUSIER

ID
COM

20%

measure the impact of AI

” *Clean engineering environments helps to unlock more AI productivity gains*

- test coverage
- documentation quality & coverage
- modularity
- static code and quality

”

*AI doesn't fix a team;
it amplifies what's already there.*

DORA 2025

× good system = **better system**

× bad system = **worse system**

*The right knobs are highly context
dependent*

SO YOU'RE TELLING ME

**I NEED TO
FIGURE OUT MYSELF**

3 Tool-Telemetry

Usage

Survey

Accessibility

Do you know which AI tools are approved for use with company code/data and have access to at least one?

How often did you use any AI assistant (chatbot, code helper, doc writer, etc.) for work?

Survey

Accessibility

Do you know which AI tools are approved for use with company code/data and have access to at least one?

How often did you use any AI assistant (chatbot, code helper, doc writer, etc.) for work?

Developer Experience

I have significant time for deep, focused work during my work days.

It's easy for me to understand and modify the code that I work with

Survey

Accessibility

Do you know which AI tools are approved for use with company code/data and have access to at least one?

How often did you use any AI assistant (chatbot, code helper, doc writer, etc.) for work?

Developer Experience

I have significant time for deep, focused work during my work days.

It's easy for me to understand and modify the code that I work with

Usage Insights

How often did AI output cause significant rework or debugging you wouldn't otherwise need?

What most limits your effective use of AI at work?

Measurement

1 Developer Survey

Observation
